PROFILE

Full-Stack Developer (MERN/PERN) who builds and ships production-deployed web applications end-to-end — schema design, APIs, authentication, and multi-target CI/CD to live infrastructure.

EDUCATION

Bachelor of Software Engineering :Prince Sattam Bin Abdulaziz University ,Graduated with **First Honors** | **GPA: 4.94/5**

PROFESSIONAL EXPERIENCE

Front-end developer, Huma-volve 🌐 06/2026 – Present

- Develop responsive dashboards, authentication flows, and business applications using React, TypeScript, Tailwind CSS, and shadcn/ui.
- Integrate JWT-secured REST APIs with Axios, TanStack Query, and Zod, building reusable, type-safe UI components.
- Collaborate with UI/UX designers and backend engineers in Agile sprints — sprint planning, code reviews, and ClickUp-based project tracking.

Front-end developer & team leader, AfaaqWare 🌐 03/2026 – Present

- Lead the front-end team building SurveyLand plat, a Next.js/TypeScript survey platform, architecting a feature-based module structure with an Atomic Design,Tailwind,React-query, bilingual .
- Set up centralized authentication, API layer (Axios + React Query hooks), and a reusable UI-state layer adopted across all feature modules.
- Directed code reviews and Git Flow branching and merging

Full-stack developer internship in Lost & Found Tech Company, Dhallaty 🌐 09/2025 – 03/2026 | Riyadh

- Built and led development of a full-stack PERN platform end-to-end — React frontend and Express/PostgreSQL backend — covering authentication, role-based access control, dashboards, and RESTful APIs.
- authoring 84% of commits (63/75) , owning both frontend and backend implementation

Information Technology Support & UI/UX co-op training, Eradah Hospital, Riyadh 🌐 01/2025 – 03/2025 | Riyadh

Provided end-user IT support and assisted with UI/UX design work, applying design-thinking and wireframing fundamentals in a healthcare operations environment.

PROJECTS

TechNotes — Full-Stack MERN Ticketing App, 🌐 ,
TypeScript, React 19, Node/Express, MongoDB, Docker, GitHub Actions

- Built a role-based ticketing app (~4,000 LOC) with JWT + httpOnly refresh-cookie auth and a normalized RTK Query data layer.
- Designed a 5-job CI/CD pipeline deploying in parallel to Netlify, Render, and a self-hosted Hetzner VPS; cut the Docker image from ~400MB to ~150MB.
- Added production observability: Sentry, structured logging, health-check monitoring, and A-grade security headers

Dhallaty — Lost & Found Platform 🌐 , *React 19, Express 5, PostgreSQL, Material UI*

- Full-stack PERN app (~6,850 LOC, 16 endpoints) with JWT auth, refresh-token rotation, PayTabs payment integration, and an admin dashboard for match management.
- Admin dashboard for confirming matches and triggering automated email notifications.
- Hardened the app with rate limiting, CORS allow-listing, constrained file uploads,
- deployed iusing Nginx with PM2 process management.

SurveyLand — Survey Management Platform,

SaaS- Next.js 15, React 19, TypeScript, Tailwind CSS 4, React Query

- Top contributor (75/240 commits, ~31%). Built JWT/OTP authentication, a 46+ component Atomic-Design library, and a typed Axios + React Query + Zod data layer.
- Delivered full EN/AR internationalization (next-intl) with RTL support and automatic language detection; drove a branch-per-feature PR workflow (44+ merged PRs).

CollabSpace — Project Management Platform [↗](#),

React 19, TypeScript, Vite, TanStack React Query, React Router (top contributor with 53% of commits)

- Top contributor (53% of commits). Architected a feature-sliced structure across 7 domains, each with its own API/hooks/components/types layer.
- Layered, fully-typed data flow (ApiClient → service → React Query hooks → components) with a Kanban board, drag-and-drop, and calendar filtering.

E-Store — E-Commerce Backend [↗](#), Node.js, Express, MongoDB/Mongoose, Stripe, PDFKit

- Built a 13-feature e-commerce backend (~2,200 LOC, MVC) incrementally across 13 Git feature branches, each isolating one backend concept and merged via pull request.
- Implemented session-based authentication and role-based authorization with bcrypt hashing, plus a product-management admin panel.
- Integrated Stripe Checkout for payments and engineered streamed PDF invoice generation (PDFKit)

SKILLS

- **Frontend Development:** HTML, CSS, JavaScript, React, TypeScript, Tailwind CSS, Material UI, Redux, React Query, Zod
- **Backend Development:** Node.js, Express.js, NestJs, JWT authentication, RESTful APIs, GraphQL
- **Databases:** PostgreSQL, MySQL, MongoDB, ORM, ODM
- **DevOps & Deployment:** Docker, Docker Compose, Nginx, PM2, GitHub Actions (CI/CD), Linux (Ubuntu), SSH, Sentry, MongoDB Atlas, Netlify, Render
- **UI/UX & Product Design:** Design Thinking, User Research, Figma, Design Thinking, Wireframing, Responsive Design
- **English Proficiency:** IELTS 7.0 (Academic)

CERTIFICATES

- Meta Advanced React js certificate [↗](#)
- Backend Node.js Complete guide [↗](#)
- Python certificates by University of Michigan [↗](#)
- PSAU Data Science Club website development [↗](#)
- The Complete Web Development Bootcamp - Udemy [↗](#)
- React.js-Hooks-Redux-State_Router React -Udemy [↗](#)
- Google UX Design Professional Certificate [↗](#)
- PSAU Software Engineering Club Presenting Web Development Work Shop [↗](#)
